Kewaunee's Evolution is a free standing workstation system that is designed to meet the changing needs of today's Laboratory and Technical environments. The column based design offers infinite height adjustment of the worksurface and shelving; as well as other column mounted accessories. Its modular design and ability to share columns helps control cost and simplifies lab layout. Three standard column heights create platforms with and without an above counter support structure. Evolution is available pre-piped and pre-wired and easily incorporates with overhead utility grids or service carriers and panels. Evolution is designed for mobile, suspended, free-standing, and overhead storage.

Standard exit point is the top of the column, but they may be routed to the bottom when specified. Power Cord color is specified by adding -BLK or -WHT to the end of the part number to signify Black or White respectively. Example: **W-5621-36-WHT**

**Cord Access Ports** are designed to route power and data cords from the interior of the column through the column accent strip, but may be used as pass-thru ports when workstations are set in a continuous run. Ports are a 2 1/2" diameter hole fitted with a rubber grommet creating a 2 1/8" diameter access. Location of ports must be specified.
